DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 6, 9-10, 12-14 of U.S. Patent No. 6,629,056. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the reference covered all the specific limitations of the current application, except the difference between applying in a lab animal (reference) and human being (current application); and the shape of the long-box. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the apparatus and method for purpose of measuring the weight of human being, since the human beings and animals may be classified as mammals; and the shape/form is disclosed by legal precedent- *In re Dailey and Eilers*, 149 USPQ 47, 50 (CCPA 1966) which provide the same result. Further, the numerical value is

inherently known in the art for any display digital or binary output from the computer/processor/processing device.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 recites the limitation "the information" in line 1. There is insufficient antecedent basis for this limitation in the claim.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
